MEMORANDUM FOR: Assistant Comptroller
ATTN: 

25X1A9a

FROM:

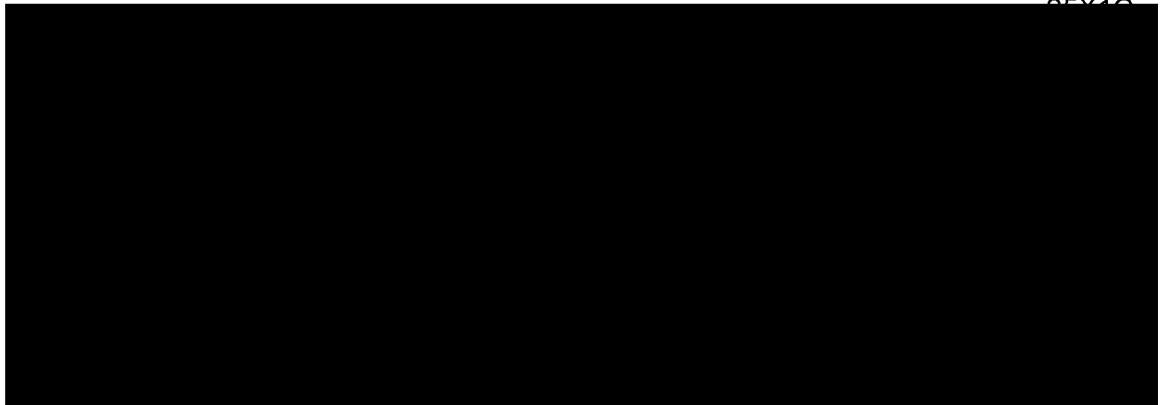

SUBJECT: Operational Information of Interest to the Comptroller's Office

25X1A

1.  paragraph 11, briefly indicates certain types of information, relative to changes in foreign currency, which should be forwarded to the Finance Division. It is believed that consideration should be given to a rewriting of this regulation, or to the issuance of either a field notice or a memorandum to field finance officers which will more clearly outline other information of use to components of the Comptroller's Office, either in the performance of their own duties or in the training and briefing of operational personnel. Concurrently, a similar regulation, notice, or memorandum should be prepared for Headquarters use in the DD/P area. In this general connection your attention is directed to an OSO memorandum to field stations dated 23 May 1947 on this subject of Fiscal Intelligence. To the undersigned knowledge this has never been reissued.

2. Some of this material is already disseminated in the form of information reports. However, much of the material believed to exist has never been disseminated since the Comptroller's Office has expressed no need for it up to this time. It is believed that advices to the field and to the area divisions would provide a flow of considerable information of interest and value at a very low cost to the Agency.

3. After further review, other points may be added, but the following represents material which the undersigned presently believes would be helpful to the Monetary Branch, to field-bound finance officers, and/or to the undersigned in his instruction of operational personnel. (Items listed in sub-paragraph "a" are of particular interest to the undersigned.)
